Alusteel Pan (Teflone)

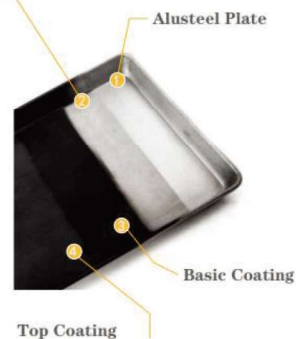

Maintenance of non teflone coating:

1. Do not use acidic cleaning solution and sharp metal articles to hurt the coating . Keep it dry after cleaning.
2. It is not allowed to burn without anything or over 260 °C . It is suggested that the temperature below 240 °C which could be longer service life.
3. Avoid strong collision and rough operation . Handle it carefully and avoid accumulation.

Teflone Coating Process:

- 1.Clean the pan.
- 2.Sanding.
- 3.Basic coating.
- 4.Top coating.

Explain:

If you looking for size L: 270mm, W:123mm, H:130mm. Number 9 is your best choice. Length is in the range.

Then, your size is as follow:

Top:L 270 X W 123mm

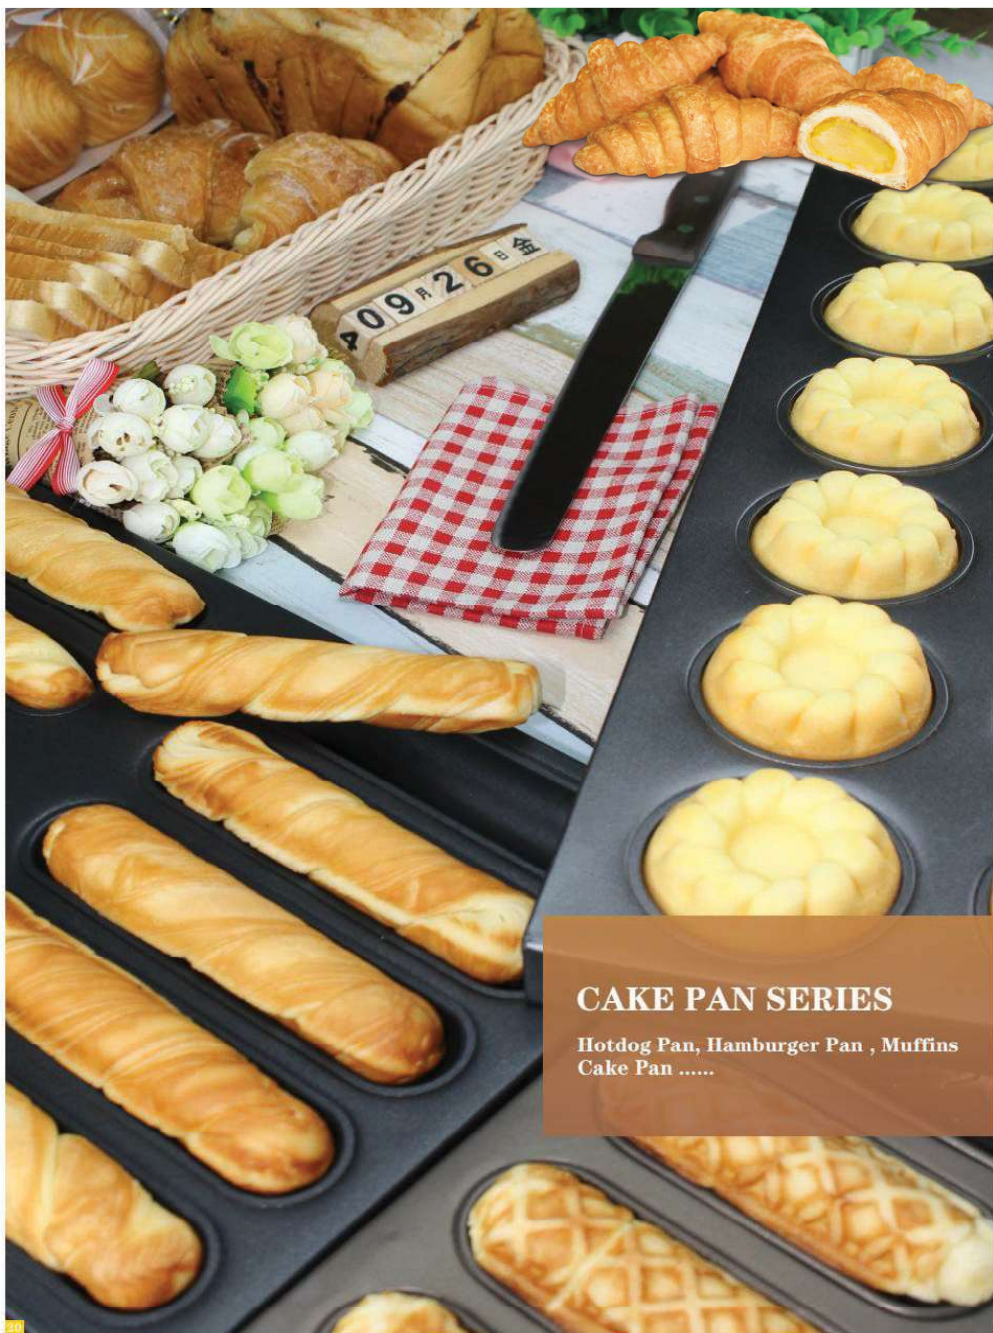

Bottom:L 267 X W 120mm

Height: 130mm

[Because K (head 3) , L of bottom is 270-3=267mm. Meanwhile ,W of bottom is 123-3=120mm]
